

SUMMARY

Data Analyst skilled in SQL, Python, Power BI, Tableau, and Excel with hands-on experience in data cleaning, ETL, exploratory data analysis, and dashboard development. Proficient in transforming complex datasets into actionable insights through data visualization and business intelligence reporting.

SKILLS

Programming: Python

Database & Querying: SQL, MySQL

Data Analysis: Data Cleaning, Data Transformation, EDA, Feature Engineering, Predictive Analytics, Statistical Analysis, Interpreting Data, KPI Reporting, Reporting & Analysis

Machine Learning & AI: Machine Learning, Scikit-Learn, NLP, LLMs

Business Intelligence & Visualization: Microsoft Power BI, Tableau, Microsoft Excel, Data Visualization, Data Storytelling, Business Analytics, Business Intelligence (BI)

Libraries & Tools: Pandas, NumPy, Jupyter, Git, GitHub, Docker, REST APIs

Concepts: Data Modeling

EXPERIENCE

Data Analyst Intern

AI Variant | Bengaluru, Karnataka | AUG 2025 – FEB 2026

- Developed Power BI and Tableau dashboards to monitor KPIs and business performance
- Extracted, cleaned, and transformed data using SQL, Excel, and Power Query
- Created DAX measures and calculated columns for interactive reporting
- Conducted EDA to identify trends, patterns, and business insights

PROJECTS

Tamil Nadu Election Analysis | [GitHub](#)

Tools: SQL, Power BI, Excel

- Analyzed constituency-level election data to identify voting patterns, party performance, and regional trends across Tamil Nadu
- Developed interactive Power BI dashboards to visualize vote share, seat distribution, winning margins and constituency-wise election insights
- Generated data-driven insights on electoral performance and voter behaviour to support comparative political analysis

Customer Churn Prediction | [GitHub](#)

Tools: Python, SQL, Power BI, Excel, Scikit-Learn

- Performed data cleaning, transformation, and exploratory data analysis to identify factors influencing customer churn
- Built and evaluated machine learning models to predict customer attrition and uncover key churn drivers
- Created visual reports and dashboards to communicate customer retention insights and support data-driven business decisions

Global Layoffs Data Analysis | [GitHub](#)

Tools: SQL, Power BI, Excel

- Analyzed global layoffs data across industries and countries to identify workforce reduction trends and economic impact
- Performed data cleaning, transformation, and exploratory analysis to improve data quality and uncover meaningful patterns
- Built interactive Power BI dashboards to track layoffs by industry, country, funding stage, and year

EDUCATION

Bachelor of Engineering (Computer Science Engineering)

Rajeev Institute of Technology, Hassan | 2021 - 2025

CERTIFICATIONS

- Microsoft Career Essentials in Data Analysis
- IBM Data Analysis Using Python
- Meta Introduction to Data Analytics
