SUMMARY

Aspiring Data Analyst skilled in SQL, Python, Power BI, Tableau, and Excel with hands-on experience in data cleaning, exploratory data analysis, and dashboard development. Passionate about transforming complex datasets into actionable business insights through storytelling, visualization, and analytical problem-solving.

EDUCATION

Rajeev Institute of Technology
Bachelor of Engineering (BE) in Computer Science.

Hassan, KA
2021-2025

EXPERIENCE

Data Analyst Intern: AI Variant / 6 Months / Bengaluru, Karnataka.

- Developed interactive Power BI and Tableau dashboards tracking 10+ KPIs including revenue, sales trends, and product performance, improving reporting efficiency by ~30%.
- Performed end-to-end ETL processes by extracting data using SQL, cleaning and transforming datasets using Excel and Power Query, and preparing structured data models for analysis.
- Created DAX measures and calculated columns in Power BI to enable dynamic drill-down reports, reducing manual reporting effort for stakeholders.
- Conducted exploratory data analysis (EDA) on sales data to identify revenue trends and underperforming segments, providing actionable insights for business decisions.

SKILLS

- **Programming & Databases:** Python, SQL, MySQL.
- **Data Analysis & Statistics:** Data Cleaning, Data Transformation, Exploratory Data Analysis (EDA), Statistics, KPI Analysis.
- **Data Visualization & BI Tools:** Power BI, Tableau, Matplotlib, Excel.
- **Tools & Platforms:** VS Code, Git, GitHub, Jupyter Notebook.
- **Data Engineering & Concepts:** Data Modelling, ETL, Business Intelligence, Data Warehousing.

PROJECTS

• **Global Layoffs Data Analysis – Worldwide Layoffs Dataset**

MAY 2026 ([GitHub](#))

TOOLS – **EXCEL, POWER BI, MySQL.**

- Analysed global layoffs data containing company-wise workforce reductions across multiple industries and countries to identify employment trends and economic impact.
- Performed data cleaning, transformation, and exploratory data analysis (EDA) using SQL and Python to handle missing values, duplicates, and inconsistent records.
- Built interactive Power BI dashboards to visualize layoffs by industry, country, funding stage, and year, enabling trend comparison and KPI tracking.
- Identified key insights such as post-pandemic hiring slowdowns, highly affected sectors, and layoff patterns among startups and large enterprises to support data-driven storytelling and business understanding.

• **HR Attrition Analysis Dashboard – Banking Dataset**

FEB 2026 ([GitHub](#))

TOOLS – **MS EXCEL, POWER BI, TABLEAU, MySQL.**

- Queried and managed employee datasets using SQL to analyse workforce trends and attrition rates.
- Applied data cleaning and transformation techniques to maintain data integrity.
- Developed Power BI dashboards to monitor HR KPIs including attrition rate, average salary, and employee distribution.
- Created Tableau dashboards to visualize workforce insights and support HR decision-making.
