

SUMMARY

Data Analyst passionate about transforming complex datasets into actionable business intelligence. Experienced in building end-to-end analytics solutions across supply chain, labor market, and customer domains using SQL, Python, Tableau, Power BI, and MySQL. Skilled in data modeling, KPI development, forecasting, and dashboard storytelling, with a focus on converting raw operational data into strategic business decisions.

SKILLS

Programming: Python

Database & Querying: SQL, MySQL

Data Analysis: Data Cleaning, Data Transformation, Exploratory Data Analysis (EDA), Statistical Analysis, Predictive Analytics, Business KPI Development, Forecasting

Business Intelligence & Visualization: Microsoft Power BI, Tableau, Microsoft Excel, Data Visualization, Data Storytelling, Business Analytics, Business Intelligence (BI)

Libraries & Tools: Pandas, NumPy, Jupyter Notebook, Git, GitHub, REST APIs

Machine Learning: Scikit-Learn

Concepts: Data Modeling, Forecasting, Business Intelligence, Supply Chain Analytics, KPI Development

EXPERIENCE

Data Analyst Intern

AI Variant | Bengaluru, Karnataka | AUG 2025 – FEB 2026

- Developed interactive Power BI and Tableau dashboards to monitor business KPIs and improve reporting efficiency.
- Extracted, transformed, and analyzed data using SQL, Excel, and Power Query to support reporting and decision-making.
- Designed DAX measures, calculated columns, and analytical reports to improve data visibility and business insights.

PROJECTS

SUPPLYSCOPE – Supply Chain Intelligence & Predictive Operations Platform | [GitHub](#)

Tools: Python, SQL, MySQL, Tableau

- Performed data cleaning, transformation, and exploratory data analysis across 8 integrated supply chain datasets to support forecasting and operational intelligence.
- Built an end-to-end Supply Chain Intelligence Platform integrating 8 datasets, 20,000+ orders, and 20,000+ shipments to analyze operational performance.
- Developed advanced SQL analytics including KPI reporting, ranking analysis, revenue insights, supplier performance evaluation, and demand forecasting metrics.
- Designed 5 interactive Tableau dashboards covering Executive Overview, Inventory Intelligence, Supplier Analytics, Logistics Performance, and Demand Forecasting.

JOBTELLECT - Labor Market Intelligence Analytics Platform | [GitHub](#)

Tools: Python, SQL, MySQL, Power BI

- Analysed 123K+ job postings and 213K+ skill mappings to identify hiring trends, skill demand, salary patterns, location-based opportunities.
- Performed data cleaning, transformation, EDA and KPI development using Python and SQL to generate workforce intelligence insights.
- Built a 4-page interactive Power BI analytics platform covering Market Intelligence, Skills Intelligence, Salary Analytics, Location Insights.

Customer Churn Prediction | [GitHub](#)

Tools: Python, SQL, Power BI, Excel, Scikit-Learn

- Performed data cleaning, transformation, and exploratory data analysis to identify key factors influencing customer churn.
- Built and evaluated machine learning models to predict customer attrition and uncover critical churn drivers.
- Developed interactive dashboards and visual reports to communicate customer retention insights and support data-driven decision making.

EDUCATION

Bachelor of Engineering (Computer Science Engineering)

Rajeev Institute of Technology, Hassan | 2021 - 2025

CERTIFICATIONS

- Microsoft Career Essentials in Data Analysis
- IBM Data Analysis Using Python
- Meta Introduction to Data Analytics
